EDUCATION

University of Central Florida

Orlando, FL

Bachelor of Science in Computer Science, Minor in Digital Media

May 2028

- Relevant Coursework: Data Structures & Algorithms I & II, Object-Oriented Programming, Systems Software, Algorithms for Machine Learning

EXPERIENCE

Full-Stack Developer

July 2026 – Present

Society of Asian Scientists & Engineers (SASE)

Orlando, FL

- Created a **centralized event management system** with **Next.js**, **TypeScript**, and **Supabase**, implementing full CRUD and a **3-state publishing lifecycle** for a **700+ member organization**.
- Established **role-based authorization and Supabase RLS**, securing administrative event operations while preserving public access to published events.
- Connected event management with **QR-based check-in workflows**, reducing manual attendance tracking by **~75%** through centralized member and event records.

Web Developer

Jan. 2026 – Present

Knights Records

Orlando, FL

- Developed a full-stack **Next.js** website with dynamic artist showcases, label content, and server-side API routes.
- Integrated **Google Calendar API** through custom endpoints to auto-sync and render club events in real time, reducing content maintenance by **90%**.
- Built a secure **OAuth**-based admin dashboard enabling club executives to manage artists, announcements, and website content through self-service CRUD operations backed by PostgreSQL.
- Implemented site-wide navigation and theming with **dedicated desktop and mobile interfaces**, route-aware states, and persistent light/dark mode.

PROJECTS

Book Nook | *React Native, Expo, Firebase, TypeScript, NativeWind*

Feb. 2026 – Apr. 2026

- Created a gamified reading and journaling app in a **4-person team** with React Native and Firebase, earning **2nd Place** at the Girls Who Code UCF Spring Project Showcase.
- Designed the **Firebase backend** for authentication, journal CRUD, user data, and real-time sync, including transactional logic for rewards, reading streaks, and collectible unlocks.
- Developed **17+ screens** and **38+ reusable components** for journaling and drag-and-drop customization, integrating **47 custom assets**.

Music Match | *Flask, Python, SQLite, JavaScript, iTunes API*

Oct. 2025 – Nov. 2025

- Built a **Flask/Python backend** for a 5-round song guessing game, managing game sessions, scoring, guess validation, and round progression across **4 REST API endpoints**.
- Integrated the **iTunes Search API**, filtering **40+ results** by artist, duplicates, and audio availability to generate randomized 5-song game sessions.
- Implemented **SQLite** persistence and a top-10 leaderboard, storing scores across sessions with normalized answer matching for case and accented characters.

I Swear I'm Human | *Next.js, React, TypeScript, Tailwind CSS, HTML Canvas, Prisma*

Nov. 2025

- Designed game-inspired email and password authentication mechanics for a “Worst UI” hackathon project using **React**, **TypeScript**, and **Next.js**.
- Programmed a falling-character email system with **real-time collision detection** and keyboard controls, managing **10+ simultaneous objects** through timed state updates.
- Developed a timing-based password system mapping a **4-second input window** across **40 characters**, with live key targeting and mouse/touch support.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C++, C, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, React Native, Flask, Tailwind CSS, Three.js, Phaser.js

Backend & Data: Node.js, Firebase, Supabase, PostgreSQL, SQLite, Prisma

Developer Tools: Git, GitHub, Visual Studio Code, Figma, Godot
